Home Care

512 Main Street Holden
MA 01521

When it comes to home care, it's all about the quality of Caregivers.

Our Caregivers undergo a rigorous screening process, including criminal background checks and review of licensing and certification status.

Rhapsody supports aging seniors, the frail, expectant mothers, persons with disabilities and recovering patients to maintain independent and dignified lifestyles.

Services

Skilled Nursing

Registered and Licensed Nurses provide overall management of patients' medical needs, which includes educating patients and their caregivers about medications, diet, and healthy living. Registered Nurses work closely with the patients' physicians and keep doctors informed of the patients' progress.

Physical Therapy

Physical Therapists assist patients rebuild their strength and endurance following an illness or surgery.

Medical Social Workers

Board-certified social workers help patients by assessing their needs and evaluating their qualifications for available community resources.

Occupational Therapy

Occupational Therapists help patients regain independence in their activities of daily living, including dressing, grooming, and eating. Occupational Therapy is especially helpful during recovery after strokes or injuries of the arm or hand.

Speech Therapy

Speech Therapists are trained to help patients with improvement of speech and treatment of swallowing disorders.

Home Care Aides

Certified home care aides assist patients with activities of daily living including bathing and grooming, working with and under the supervision of Registered Nurses and Therapists.
